GAN 356 RS Elite-M (Magnetic) is one of the Cubelelo's most affordable magnetic cube offerings. The base product of this cube is GAN 356 R. This budget magnetic 3x3 is crispier and more stable than the normal Little Magic, thanks to the introduction of unique magnetic elements. With a compact size, split-piece design this cube is the perfect choice for fast and controllable cube lovers.

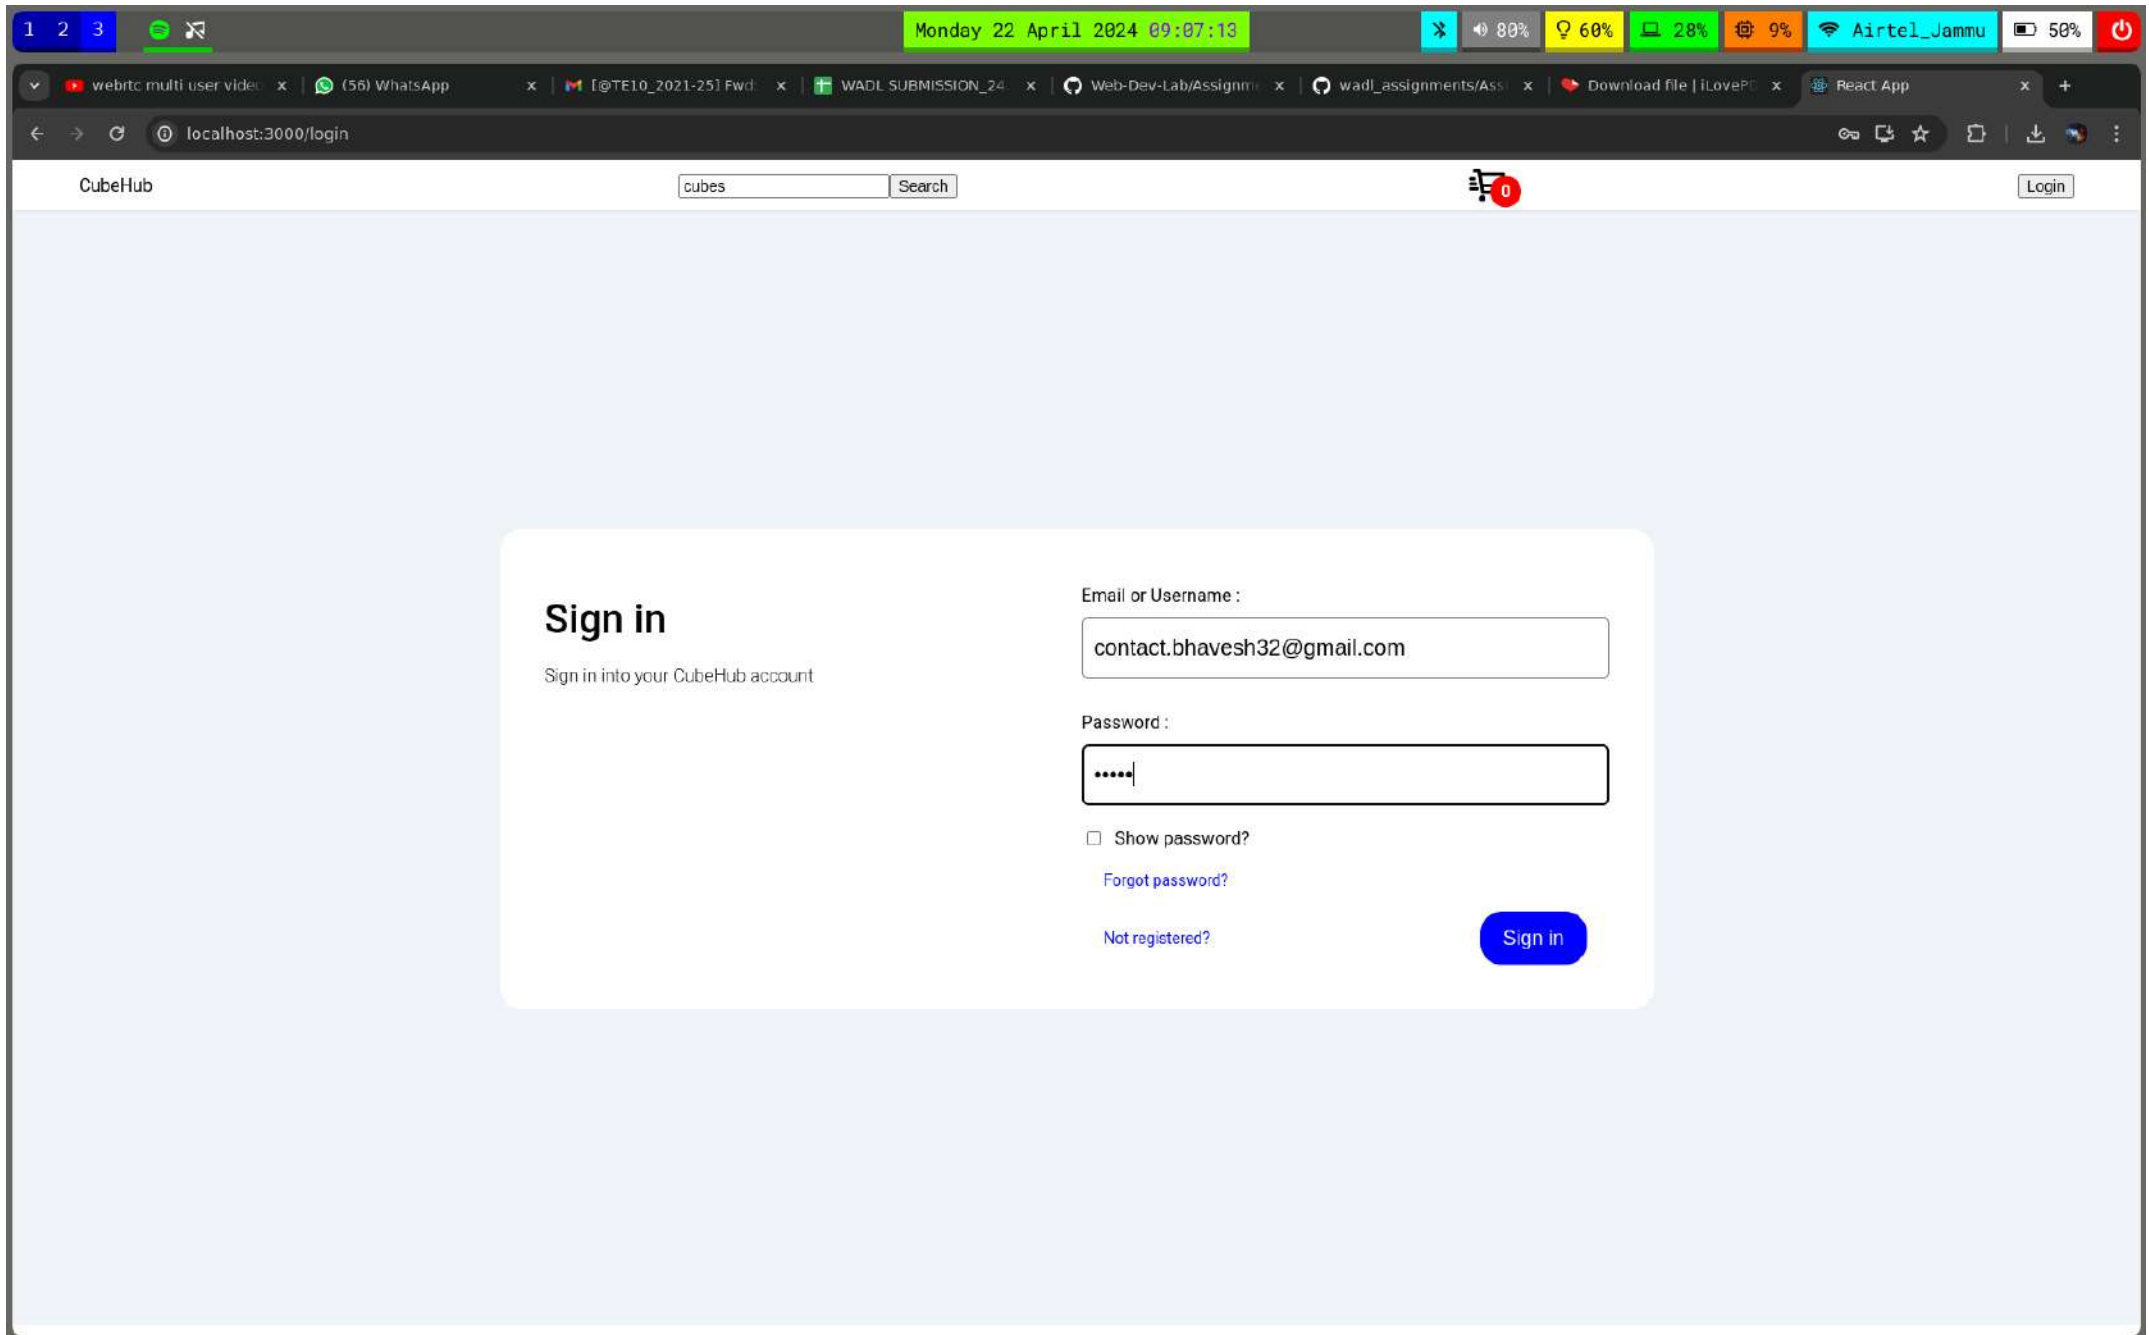

We have introduced forty-eight neodymium magnets of suitable strength at various strategic locations in the cube, arranged in a way to ensure precise symmetric pattern while rotation.

A tactile and very stable feel with clean, clicky feedback regardless of piece orientation is achieved due to this magnetization effect.

The magnetic attraction between the pieces results in increased efficiency while minimizing overshooting and undesirable lockups.

This perfect cube for one-handed solves has been made super stable with our elite services.

High-quality super glue is used and allowed to cure for the optimum time to ensure perfect adhesion between the magnets and the material of the puzzle.
